

FCA US LLC

Part of the Stellantis Group of Companies

Intellectual Property Office (IP Office)

CIMS 483-02-19

Located in CTC Suite E2002A (Operations Center Node)

248-944-6500

FCA US originating IDR submissions & questions: idrsubmission-na@stellantis.com

for IP Office use only

Internal Ref.:

Received by IP Office:

Invention Development Record (IDR) Submission Form

Important Information

- **Who should use this form:** Use this form if you are an employee or contractor working out of the US, Canada, Mexico, or India.
- **An incomplete form cannot be processed:** The IP Office will record receipt of all submissions but will not review them for patenting consideration until all sections are properly completed.
- **Submit this form to the FCA US IP Office only.** This form is not intended for VEIP Inventor Portal submissions. Send in a single email message to idrsubmission-na@stellantis.com all the following:
 - o Fully completed IDR form
 - o Invention Description document (see Section 5)
 - o Additional inventor information (see Section 3) and conception documents (see Section 7), if applicable
- **Hardcopy Submissions** may be delivered to the above location at CTC. Hardcopy submissions are subject to additional processing time, and a receipt acknowledgement email message may be delayed.
- **Urgency:** If you believe that IP Office review of an IDR should be expedited, explain why in the original IDR submission email or in a subsequent email message.

1. Title of Invention (Be descriptive and concise. This is used for database searching.)

Method of preventing electric vehicle charging derate from charge port overheating

2. Invention Domain/Category (Select the ONE best combination)

Body, Chassis, Interior (BCI)

Body

- ☐ BIW, Superstructure
- ☐ Closures, Glass
- ☐ Fascia, Bumper, Roof Panel
- ☐ Accessories, Ext. Equip.

Chassis

- ☐ Brakes
- ☐ Frame
- ☐ Steering, Pedals, Wheels
- ☐ Suspension

Interior

- ☐ IP, Cluster, Console
- ☐ Seating
- ☐ Trim, Mirror, Carpet
- ☐ Safety

- ☐ Other

Software, Electrical, Electronic Sys. (SEES)

Driving

- ☐ ADAS, Active Chassis
- ☐ Interior Sensing
- ☐ V2x

Offboard Communication

- ☐ Connectivity
- ☐ Computing

Onboard Communication

- ☐ Connectivity
- ☐ Infotainment

HMI, Displays, UX

- ☐ Lighting
- ☐ Other

Propulsion Systems (PRS)

Energy Converters

- ☐ Electric Motor
- ☐ ICE
- ☐ Fuel Cell

Energy Storage, Distribution

- ☐ Battery
- ☐ Power Electronics

Driveline

- ☐ Trans., Drive Unit
- ☐ Axle, Shaft

Engine Systems

- ☐ HVAC
- ☒ Other

Note: Hardware, Electrical, Controls, AI, Service, and Manufacturing/Assembly reside under the appropriate category above

3. Inventorship

- List each inventor and only inventors. Under U.S. law, to be an inventor, a person must have helped conceive the subject matter of the invention.
- People are not inventors if they merely pointed out a problem to be solved, suggested desired specifications or results, followed instructions of a person who conceived the inventive solution, or supervised a project, people or team or funded a development project.
- Include all inventors, even if they do not currently work for the Stellantis group of companies.

Number of Inventors: 2 (If there are more than 4 inventors, reproduce Page 3 and submit it with this form.)

Full Legal Name of Inventor 1: Sina Shojaei

Employing Entity: ☒ FCA US ☐ FCA US subsidiary (FCA Canada, FCA Mexico, FCA Engineering India)
☐ Other region (EMEA, LATAM, APAC) ☐ Third-party (e.g., supplier or university)

Classification: ☒ Monthly ☐ Bi-Monthly ☐ Contract Worker ☐ Purchased Service ☐ Represented ☐ Supplier/Other

Affiliate, Contracting, or Supplier Company (if applicable): _____

Employee Identification Number (CID, TID, or FID): T7418A0

Does the inventor work in Advanced Engineering? ☐ Yes ☒ No

Department Name (e.g., ENG/PRS/PVPC/CSRD): ODDT/PRS/PVPC/PCEL

Home Street 4132 Walcott Dr

Address _____

City Lake Orion State MI Zip 48359

Best Work Phone #: 248-241-5119 Personal Phone #: _____

Work Email: sina.shojaei@stellantis.com Personal Email: _____

Citizen of: United States

☒ Check this box if the inventor is a drafter of the content of this IDR submission.

Typed or Written Signature: Sina Shojaei

Full Legal Name of Inventor 2: Feisel Weslati

Employing Entity: ☒ FCA US ☐ FCA US subsidiary (FCA Canada, FCA Mexico, FCA Engineering India)
☐ Other region (EMEA, LATAM, APAC) ☐ Third-party (e.g., supplier or university)

Classification: ☒ Monthly ☐ Bi-Monthly ☐ Contract Worker ☐ Purchased Service ☐ Represented ☐ Supplier/Other

Affiliate, Contracting, or Supplier Company (if applicable): _____

Employee Identification Number (CID, TID, or FID): T6051FO

Does the inventor work in Advanced Engineering? ☐ Yes ☒ No

Department Name (e.g., ENG/PRS/PVPC/CSRD): PDT/PRS/PVPC

Home Street 1150 Prosper Dr

Address _____

City Troy State MI Zip 48098

Best Work Phone #: 248-420-0737 Personal Phone #: _____

Work Email: faz.weslati@stellantis.com Personal Email: _____

Citizen of: United States

☒ Check this box if the inventor is a drafter of the content of this IDR submission.

Written or Electronic Signature: _____

Full Legal Name of Inventor 3: _____

Employing Entity: ☐ FCA US ☐ FCA US subsidiary (FCA Canada, FCA Mexico, FCA Engineering India)
☐ Other region (EMEA, LATAM, APAC) ☐ Third-party (e.g., supplier or university)

Classification: ☐ Monthly ☐ Bi-Monthly ☐ Contract Worker ☐ Purchased Service ☐ Represented ☐ Supplier/Other
Affiliate, Contracting, or Supplier Company (if applicable): _____

Employee Identification Number (CID, TID, or FID): _____

Does the inventor work in Advanced Engineering? ☐ Yes ☐ No

Department Name (e.g., ENG/PRS/PVPC/CSRD): _____

Home Street

Address _____

City _____ State _____ Zip _____

Best Work Phone #: _____ Personal Phone #: _____

Work Email: _____ Personal Email: _____

Citizen of: _____

☐ Check this box if the inventor is a drafter of the content of this IDR submission.

Written or Electronic Signature: _____

Full Legal Name of Inventor 4: _____

Employing Entity: ☐ FCA US ☐ FCA US subsidiary (FCA Canada, FCA Mexico, FCA Engineering India)
☐ Other region (EMEA, LATAM, APAC) ☐ Third-party (e.g., supplier or university)

Classification: ☐ Monthly ☐ Bi-Monthly ☐ Contract Worker ☐ Purchased Service ☐ Represented ☐ Supplier/Other
Affiliate, Contracting, or Supplier Company (if applicable): _____

Employee Identification Number (CID, TID, or FID): _____

Does the inventor work in Advanced Engineering? ☐ Yes ☐ No

Department Name (e.g., ENG/PRS/PVPC/CSRD): _____

Home Street

Address _____

City _____ State _____ Zip _____

Best Work Phone #: _____ Personal Phone #: _____

Work Email: _____ Personal Email: _____

Citizen of: _____

☐ Check this box if the inventor is a drafter of the content of this IDR submission.

Written or Electronic Signature: _____

4. **Problem-Solution Statement** This invention is (*choose one*):

- ☒ a new solution to a known problem by using new technology (i.e.: not known to be currently implemented for any purpose)
- ☐ a new solution to a known problem by using existing technology in a new manner (i.e.: using existing technology that is currently implemented for a different purpose)
- ☐ an improvement to an existing solution for a known problem
- ☐ a solution to a newly identified problem

5. **Invention Description**

- The purpose of this section is to fully describe the invention, so that a person, who is not an expert in the field of the invention, can fully understand it. The description should stand on its own and not require a follow-up meeting.
- Provide your responses in a text document or presentation document named "Section 5 Responses" incorporating the below subsection headings 5.1- 5.6 and submit the document with this form.
- Provide complete and concise responses to Subsections 5.1-5.6. You can add an optional "Additional Information" section after subsection 5.6 to provide any other relevant information, such as additional background, derivations, test results, or a DFSS presentation.
- Rarely will one-sentence responses suffice. Insufficient detail will require follow-up communications that will delay a patent filing decision.
- Describe the main components or steps and focus on the new or changed ones. Add sketches, plots, and images as necessary.
- Algorithms and methods must be described with flowcharts and supporting text. Programming code is not required.
- Define uncommon acronyms and industry/company jargon.

5.1) **Invention Description**

Include i) its main components, systems and/or processes; and ii) the main vehicle systems (components, controllers, etc.) your invention operates with. Include any alternate configurations or methods.

5.2) **Problem**

Describe the problem that your invention solves or the need that it satisfies.

5.3) **Previous Solutions**

Describe previously known solutions to the problem identified in §5.2. Consider the internal, competitor OEM, and supplier solutions known by all co-inventors. If the invention satisfies a new need, explain how the automotive industry previously functioned without it.

5.4) **Previous Solution Drawbacks**

Describe the drawbacks or deficiencies of the previous known solutions identified in §5.3. If the invention satisfies a new need, explain the opportunities the automotive industry may have missed.

5.5) **Invention Solution**

Describe how your invention solves the problem identified in §5.2, even if you included this information in a previous subsection.

5.6) **Innovation/Differences**

Describe how your invention's solution to the problem is different than the other previously known solutions identified in §5.3, even if you included this information in a previous subsection. What sets your invention apart from the known solutions is what could be claimed in a patent application.

6. Related Material

- List all presently known products, published papers, previously submitted IDR forms, or other publicly available information related to the invention.

7. Invention Conception and Production/Development Status Information

- **Location of Inventive Activity:** Identify the countries where inventive activity occurred, and identify the primary country.

United States

- **Funding:** Has there been any money spent in developing this invention?

☐ Yes ☒ No If yes, identify the Stellantis company(ies) that provided the funding:

- **Production or Development Status** of the Invention (Check only one):

☐ Already launched in production

Provide the earliest date and vehicle that was produced with the invention:

Date: _____ Model Year & Vehicle/Program: _____

In what global regions will vehicles be built and/or sold with the invention?

☒ Plan-of-record / Released for production but not already launched

Provide the current launch date and vehicle:

Date: September 2026 Model Year & Vehicle/Program: 27MY EJ BEV

In what global regions will vehicles be built and/or sold with the invention?

NA , EMEA

☐ An option being considered for production but not yet plan-of-record

Provide the expected decision date and vehicle/brand:

Date: _____ Model Year & Vehicle/Program/Brand: _____

In what global regions will vehicles be built and/or sold with the invention?

List funded development

project name, if applicable: _____

☐ A concept that is not currently part of a funded development project. Leave optional comments below:

8. Disclosure: Affiliate and/or Third-Party Involvement

- Excluding purchase orders, are you aware of a contract (e.g., NDA or joint development agreement) covering the development of your invention?

☐ Yes ☒ No

If Yes, provide the name of the party, type of contract, and any known details:

- Has this invention been disclosed, published or used outside of FCA US? ☐ Yes ☒ No

If Yes, provide

explanation including

date and circumstances: _____

If No, are there future plans to

disclose (e.g., paper, presentation,

to a supplier, etc.) Explain and provide

planned date of disclosure: _____

- Has any supplier or other non-FCA US personnel contributed to this invention? ☐ Yes ☒ No

If Yes, identify

and provide

explanation: _____

- Is this invention the result of work performed under a government project? ☐ Yes ☒ No

If Yes, provide explanation

and government

project/contract #: _____

- Is this invention the result of work performed under a university research project? ☐ Yes ☒ No

If Yes, provide explanation

and university

project/contract #: _____

9. Technology Manager Review

The inventors acknowledge that a Technical Fellow/Specialist, Engineering IP Lead, or someone, who has overall responsibility for development of this technology, has reviewed this invention. No signature is required.

Technology Manager Name: Faz Weslati

Title & Technology/Program Responsibility: Director -Electrified Propulsion Controls

Department Name (e.g., ENG/PRS/PVPC/CSRD): PDT/PRS/PVPC

Technology manager's opinion of the invention's value to the program or technology space:

- ☐ 1) **Very high value:** market differentiator or brand unique selling point
- ☐ 2) **High value:** improvement to production vehicle performance, quality, cost, UX, or manufacturing
- ☒ 3) **Medium value:** concept that is being developed and will potentially have a positive commercial impact
- ☐ 4) **Unknown value:** concept that needs further development to assess its value
